About me

I'm a dynamic and personable person with a strong focus on back-end development using Javascript libraries/frameworks and some stacks like MERN and MEVN. I'm passionate about modular systems, building quality software, and making the web faster for the past years, and now seeking to draw on proven software development and engineering skills to increase and improve companies' impressive lines of applications

Experience

CBLink, Rwanda - *Web Developer (Hybrid)* **- Jan 2022 - Aug 2022**
- Created an efficient stock management app that also handles invoices and tax payments.
- Got to provide clear and vague documentation of APIs created
- Backend server optimization and testing
- Deployed the app to production
- Website: https://cblink.rw

SynerTech, Rwanda- *FullStack Developer (Remote)* **- Aug 2022 - March 2023**
- Create scripts the deal with file management
- Worked on a clinic management app
- Handled database integration since the app had much database integration
- Deployed Laravel APIs
- Optimise apps to enhance performance and reduce data redundancy
- Remove verbose code, and update codebase to Laravel 9
- Successful deployment with Heroku Dynos and PostgreSQL database.
- Website: https://synertech.rw

Umurava Work, Rwanda- *Software Developer (Remote)* **- Dec 2022 - Present**
- Create Amazing UI for their home app

- Matching design with frontend
- Did API integration and optimised app with caching
- Used tailwind css for responsiveness.
- Deployed app and purchase of domain names as per client wishes.
- Website: https://umurava.africa/
